Campaign performance analysis

Which campaigns generate the highest conversions?

Campaigns: acceptance rate comparison

Ranked by conversion performance — Campaign 6 is the most recent and highest performing

Highest performing: Campaign 6

334 conversions at 14.9% — more than double any earlier campaign. This likely reflects cumulative learning and audience refinement over time.

Lowest performing: Campaign 2

Only 30 acceptances (1.3%). Severely underperformed — messaging, timing, or targeting likely misaligned with audience needs.

Campaigns 4 & 5 near-tied

Both at ~7.3–7.5% acceptance, suggesting a performance plateau before Campaign 6 broke through. Investigate what changed in Cmp6.

Multi-campaign acceptors are rare

Only 138 customers accepted 2+ campaigns. 79.3% (1,777) accepted none. Re-engagement strategy needed for the non-responsive majority.
